KEYSTORE FILE

A keystore file contains the password encrypted version of your private key. Generation process takes your private key through AES-128-CTR and KDF-SCRIPT encryption algorithms. It can take from 20 seconds to over a minute depending on your computer to encrypt your private key. After some time if your browser prompts that web page is not responding, then please click on wait.

To spend the cryptocurrencies in your wallet, you need to have your keystore file as well as your password.

If you misplaced your keystore file or forgot your password or both, then you will not be able to spend your funds.

Then only way to unlock your funds is your mnemonic phrase. So keep it super safe.
